....hereby endorse and support the MYWASTE concept and its relevant website. The informative website has been found to be extremely useful in that it directs the general public to their closest drop-off places and buy-back centres, thereby encouraging recycling. It also provides a point where collectors, emerging small businesses, recycling facilities, SMME's and others involved in sustainability and waste management can register their services at no charge.

MYWASTE has a particularly unique offering which adds tremendous value in assisting the general public and other interested parties in the cleaning up of our environment".

Yours Sincerely

CHARLES MULLER
EXECUTIVE DIRECTOR
